

## EHS 100: Introduction to Environmental Health Sciences

UCLA Fielding School of Public Health

<http://ccle.ucla.edu/course/view/17S-ENVHLT100-1>

Syllabus – Spring 2017 – Last Updated February 1, 2017

**please note that this syllabus is subject to change – please check course website for updates**

### Course information

**Time:** Tues & Thurs. 1 pm – 2:50 pm

**Location:** 43-105 CHS

#### Instructors:

Hilary Godwin, PhD  
Professor, Environmental Health  
Sciences

e-mail: [hgodwin@ucla.edu](mailto:hgodwin@ucla.edu)

office: 16-035 CHS

office phone: 310-794-1238

cell: 818-239-6127

office hours: by appointment via

<https://calendly.com/hgodwin>

or contact [fsphucla@gmail.com](mailto:fsphucla@gmail.com)

Richard J Jackson MD MPH  
Professor, Environmental Health  
Sciences

e-mail: [dickjackson@ucla.edu](mailto:dickjackson@ucla.edu)

office: 51-297B

phone: 310-206-8522

office hours: by appointment

#### Teaching Assistants:

Tamanna Rahman

TBD

### Course Overview

In this class, you will obtain an introduction to current areas of research in, applications of, and methodologies used in the field of Environmental Health Sciences.

### Required Text & Individual Response Devices

Essentials of Environmental Health (Paperback)

by Robert H., Ph.D. Friis

Publisher: Jones & Bartlett Publishers; 2nd edition (2012)

ISBN-10: 9781284026337

Students are required to bring their clickers starting the first day of class in Week 1. You can use the iClicker+, iClicker or iClicker2 for participation. The web-based app (REEF Polling by i>clicker) can also be used if you have a compatible device and a sufficient WIFI connection. For iPhone and iPad users, search for REEF Polling in the Apple app store. For Android and laptop users, go to [reef-education.com](http://reef-education.com) on your web browser and sign in. After you purchase a clicker OR the app then you need to register your iClicker ID on the CCLE course website before the start of class. There is a link on the right

panel of the course webpage for iClicker registration. We will show you where to register on the first day of class if you cannot find it on your own, or are not clear about what you need to do.

### Course Website

All homework assignments are posted on the course website which uses the Moodle platform (<http://ccle.ucla.edu/course/view/17S-ENVHLT100-1>). In addition, copies of the lecture (Powerpoint presentations) and any case studies/handouts will be posted on the course website AFTER each class. You should also check to make sure that you are able to access Turnitin.com for this course through my.ucla.edu as soon as possible. If you are unable to access either of these sites, please contact the instructor ([hgodwin@ucla.edu](mailto:hgodwin@ucla.edu)).

### Recordings

Some (if not all) of the sessions of EHS 100 will be recorded during the quarter, which means that your voice and/or visuals of you may be captured during course recordings. These recordings will be made available for online viewing to students in the class afterwards. Recordings are a complement to attending class in person and are not intended as a replacement for active participation and engagement during class. Some of the benefits of having access to lectures online include allowing you to review material before quizzes, midterms and finals, to go over concepts you would like to reinforce after class on your own time, or to review areas you want more clarification on. We will keep you posted regarding how to access the recordings online, but they will most likely be made available via our course website:

<http://ccle.ucla.edu/course/view/17S-ENVHLT100-1>

### Course Structure

The class meets from 1-2:50 Tuesdays and Thursdays. Please read all required readings prior to coming to each class. Reading Assignments are listed in the tentative course schedule found at the end of this syllabus; any updates will be posted on the course website (<http://ccle.ucla.edu/course/view/16S-ENVHLT100-1>).

### Course grading

There are five primary sources of evaluation for this class:

(1)	Homework Assignments (5)	20% of total grade
(2)	Class participation (based on individual response units)	10%
(3)	Midterm	25%
(4)	Group Presentation	10%
(5)	Final Written Report	10%
(6)	Final Exam	25%

## Homework Assignments

There will be 5 homework assignments. You must submit your assignments electronically via the course website (<http://ccle.ucla.edu/course/view/17S-ENVHLT100-1>). Do NOT submit your assignments via email. All assignments must be submitted electronically prior to the beginning of class on Tuesday of the week that they are due. A 10% penalty (of the total possible points) will be deducted from late assignments for every day or partial day that the assignment is late. Late assignments will not be accepted after 3 days. All homework (unless otherwise specified in writing by the instructors) must be your own individual work (see **Academic Integrity**, below) and may NOT be completed in groups. When indicated on the assignment, homework assignments and the final report will be checked for authenticity using TurnItIn.com.

## Class Participation

For each topic covered in the course, there is a related case study, which you will work on in class in your assigned groups. Class participation points are based on your individual active participation on answering questions in class (usually related to the case studies) – you do not need to get the “correct” answer to get credit for participating on a given item, but you do need to “click in”/participate using your individual response unit (either iClicker or REEF) on 75% of the response questions on each day in order to receive credit for participation that day. You will be given two “free” days of participation points. This should account for any technical difficulties, absences, or forgetting your clicker. Each student is responsible for both bringing their response unit to class each day and making sure that it is working and appropriately registered.

## Midterm

There will be a midterm exam given in class (1-2:50 in 43-105 CHS) on Thursday, May 4th. The midterm exam will consist of 50 multiple choice questions and 10 short answer questions. In addition to the materials covered in class (both by the professors and by your classmates) and the Course Learning Objectives provided below, please see the Learning Objectives at the beginning of chapters 1-8 of *Essentials of Environmental Health*, by Robert H. Friis for material that will be covered on the midterm.

## Group Presentation

Each group will be responsible for making a fifteen minute presentation of their final project using Powerpoint on either May 30<sup>th</sup>, June 1<sup>st</sup>, or June 6<sup>th</sup>. Please be sure to upload your Powerpoint presentation to the class website before class on the day that you are presenting. **PLEASE NOTE THAT ALL STUDENTS ARE EXPECTED TO ATTEND ALL GROUP PRESENTATIONS AND TO COMPLETE PEER REVIEW FORMS FOR EACH OF THE OTHER GROUPS.** The grade for this portion of the course will be based on both your own presentation (performed by group in class), and your participation in peer review of other group presentations (using clickers in class).

## Final Written Report and Group Presentation

The final written report allows you to demonstrate your ability to develop and test a hypothesis about how a particular type of environmental insult impacts health. Projects will be developed in small groups (assigned at the beginning of the course) but each student is responsible for submitting their own written report (see website for required format for this assignment). The final written report must be written individually (i.e. each student writes his or her own report.) All written reports must be submitted electronically to both Turnitin.com (see link from our course in my.ucla.edu or the block at the right side of the course website) AND the course website (<http://ccle.ucla.edu/course/view/17S-ENVHLT100-1>) prior to the beginning of class on Thursday, June 8<sup>th</sup>, regardless of the day on which your group is presenting. A 10% penalty (of the total possible points) will be deducted from late assignments for every day or partial day that the assignment is late. Late assignments will not be accepted after 3 days.

## Final Exam

There will be a final exam given during finals week: Monday, June 12<sup>th</sup>, from 8-11 am in our regular classroom (43-105 CHS). The final exam will consist of 50 multiple choice questions and 10 short answer questions on topics primarily (but not exclusively) from the second half of the course (i.e., after the midterm). In addition to the materials covered in class (both by the professors and by your classmates) and the Course Learning Objectives provided below, please see the Learning Objectives at the beginning of each chapter of *Essentials of Environmental Health*, by Robert H. Friis for material that will be covered on the final exam.

## Students With Disabilities

Students needing academic accommodations based on a disability must contact the Center for Accessible Education (CAE) at (310) 825-1501 or present in person at Murphy Hall A255. As the professionals delegated authority from the campus to determine reasonable disability accommodations, CAE will assess all requested accommodations and communicate appropriately with faculty. In the event that a student has approval for proctoring arrangements during exams, please inform the instructors and teaching assistant(s) before the date of the midterm and final exams. When possible, students should contact the CAE within the first two weeks of the term as reasonable notice is needed to coordinate accommodations. For more information, visit [www.cae.ucla.edu](http://www.cae.ucla.edu).

## Academic Integrity

All submitted work MUST BE YOUR OWN. Although you are encouraged to work on your final project in groups and may study in groups, all work submitted for a grade (Homework Assignments and Final Report) must be IN YOUR OWN WORDS AND PROPERLY CITED where appropriate. In addition, all examinations must be performed individually and are closed book. You are expected to read and follow the UCLA Student Conduct Code (<http://www.deanofstudents.ucla.edu/conduct.html>) and the guidelines from the Registrar's office on avoiding plagiarism (see

(<http://www.registrar.ucla.edu/soc/notices.htm#Anchor-Plagiarism-6296> and also <http://www.library.ucla.edu/b Bruinsuccess/> ). If you are not sure whether a particular action is in violation of UCLA's standards of academic integrity or constitutes plagiarism, please contact the instructor and error on the side of caution. Ignorance of the University's policies is not a legitimate excuse for violating them. ALL VIOLATIONS OF THESE POLICIES WILL BE REFERRED IMMEDIATELY TO THE DEAN OF STUDENTS FOR REVIEW AND DISCIPLINARY ACTION.

**Learning Objectives and Competencies for EHS 100**

Upon completion of this course, you should be able to demonstrate the skills listed as “Course Learning Objectives” below. These learning objectives were selected to help you build competencies required for the MPH program (see <http://ph.ucla.edu/current-students/programmatic-competencies>).

<b>COURSE LEARNING OBJECTIVES</b>	<b>HOW THESE LEARNING OBJECTIVES ALIGN WITH MPH CORE COMPETENCIES</b>
<p>1. Given a specific environmental agent, use data sources to develop a concise summary of the agent’s sources, basic attributes, and fate.</p>	<p>C1. Describe the direct and indirect human, ecological and safety effects of major environmental and occupational agents.</p> <p>C5. Specify approaches for assessing, preventing and controlling environmental hazards that pose risks to human health and safety.</p> <p>C9. Identify key sources of data and use existing databases to provide background or supportive data to address environmental health questions.</p> <p>F14. Apply evidence-based principles and the scientific knowledge base to critical evaluation and decision-making in public health.</p>

<b>COURSE LEARNING OBJECTIVES</b>	<b>HOW THESE LEARNING OBJECTIVES ALIGN WITH MPH CORE COMPETENCIES</b>
<p>2. Identify adverse effects of environmental agents on human health (both acute and chronic), on ecosystems, and on other risks (including economic and psychological), which requires an awareness of susceptibility, toxicity, and methods of risk analysis.</p>	<p>C1. Describe the direct and indirect human, ecological and safety effects of major environmental and occupational agents.                      C2. Describe physiologic and psychosocial factors that affect susceptibility to adverse health outcomes following exposure to environmental hazards.                      C4. Specify current environmental risk assessment methods.                      C6. Explain the general mechanisms of toxicity in eliciting a toxic response to various environmental exposures.                      C9. Identify key sources of data and use existing databases to provide background or supportive data to address environmental health questions.                      F11. Articulate how biological, chemical and physical agents affect human health.</p>
<p>3. Recommend systematic controls of environmental health hazards, demonstrating an awareness of state and federal regulatory programs.</p>	<p>C3. Describe federal and state regulatory programs, guidelines, and authorities that control environmental health issues.                      C5. Specify approaches for assessing, preventing and controlling environmental hazards that pose risks to human health and safety.</p>
<p>4. Develop a testable model of environmental insults as a means of improving forensic skills for assessing, preventing, and controlling hazards.</p>	<p>C5. Specify approaches for assessing, preventing and controlling environmental hazards that pose risks to human health and safety.                      C8. Develop a testable model of environmental insult.                      F14. Apply evidence-based principles and the scientific knowledge base to critical evaluation and decision-making in public health.</p>

<b><i>COURSE LEARNING OBJECTIVES</i></b>	<b><i>HOW THESE LEARNING OBJECTIVES ALIGN WITH MPH CORE COMPETENCIES</i></b>
<p>5. Accurately and effectively communicate environmental health risks to targeted stakeholders and explain why/whether some populations are at greater risk than others for specific agents.</p>	<p>C7. Discuss various risk management and risk communication approaches, including their relation to issues of environmental justice and equality.                      F5. Demonstrate effective written and oral skills for communicating with different audiences in the context of professional public health activities.</p>
<p>6. Describe an example of how regulations and/or inspections have been used to prevent environmental health problems; describe who has the authority to impose these regulations in our region.</p>	<p>C3. Describe federal and state regulatory programs, guidelines, and authorities that control environmental health issues.</p>

**EHS 100 Spring 2017**  
**Tentative Course Schedule**  
 Class meets 1-2:50 am Tues, Thurs.  
 Lectures are in 43-105 CHS

Date	Lecture Topic	Reading Assignment (Read before class)	Homework Assignment (Must be submitted electronically before the beginning of class on day indicated)
<b>Tues., April 4th</b>	Introduction to Environmental Health Sciences; Overview of Course Format and Learning Objectives ( <i>Godwin</i> ) RJJ out of town	Friis: Chapter 1	
<b>Thurs., April 6th</b>	Environmental Toxicology ( <i>Godwin</i> ) RJJ out of town	Friis: Chapter 3	
<b>Tues., April 11<sup>th</sup></b>	Environmental Epidemiology ( <i>Jackson</i> )	Friis: Chapter 2	<i>Homework Assignment 1: Developing a Hypothesis</i>
<b>Thurs., April 13<sup>th</sup></b>	Environmental Policy and Regulation ( <i>Jackson</i> )	Friis: Chapter 4	
<b>Tues., April 18<sup>th</sup></b>	Agents of Environmental Disease: Zoonotic and Vector-Borne Diseases ( <i>Jackson</i> )	Friis: Chapter 5	Homework Assignment 2: Literature Search Related to Your Hypothesis
<b>Thurs., April 20<sup>th</sup></b>	Agents of Environmental Disease: Pesticides and Other Organic Chemicals ( <i>Jackson</i> )	Friis: Chapter 7	
<b>Tues., April 25<sup>th</sup></b>	Agents of Environmental Disease: Toxic Metals and Elements ( <i>Godwin</i> )	Friis: Chapter 6	<i>Homework Assignment 3: Summary of a Literature Article Related to Your Hypothesis</i>

Date	Lecture Topic	Reading Assignment (Read before class)	Homework Assignment (Must be submitted electronically before the beginning of class on day indicated)
<b>Thurs., April 27<sup>th</sup></b>	Agents of Environmental Disease: Ionizing and Nonionizing Radiation ( <i>Jackson</i> )	Friis: Chapter 8	
<b>Tues., May 2<sup>nd</sup></b>	Review for Midterm ( <i>Godwin</i> )		
<b>Thurs May 4<sup>th</sup></b>	<b>MIDTERM</b> ( <i>Godwin and TAs proctoring</i> )		
<b>Tues., May 9<sup>th</sup></b>	Applications of Environmental Health: Food Safety ( <i>Jackson</i> )	Friis: Chapter 11	<i>Homework Assignment 4: Selecting a Hypothesis to Test as a Group</i>
<b>Thurs., May 11<sup>th</sup></b>	Applications of Environmental Health: Air Quality ( <i>Jackson</i> )	Friis: Chapter 10	
<b>Tues., May 16<sup>th</sup></b>	Applications of Environmental Health: Water Quality ( <i>Godwin</i> )	Friis: Chapter 9	<i>Homework Assignment 5: Finding Data to Confirm or Refute Your Hypothesis</i>
<b>Thurs., May 18<sup>th</sup></b>	Applications of Environmental Health: Solid and Liquid Wastes ( <i>Godwin</i> ) RJJ out of town	Friis: Chapter 12	
<b>Tues., May 23<sup>rd</sup></b>	Applications of Environmental Health: Occupational Health ( <i>Godwin</i> )	Friis: Chapter 13	

Date	Lecture Topic	Reading Assignment (Read before class)	Homework Assignment (Must be submitted electronically before the beginning of class on day indicated)
<b>Thurs., May 25<sup>th</sup></b>	How to Give An Effective Oral Presentation Using Powerpoint (Godwin)		
<b>Tues. May 30<sup>th</sup></b>	IN CLASS PRESENTATIONS ( <i>Godwin, Jackson and TAs present; entire class must attend</i> )		<i>If you are presenting, upload your Powerpoint presentation before class</i>
<b>Thurs. June 1<sup>st</sup></b>	IN CLASS PRESENTATIONS ( <i>Godwin, Jackson and TAs present; entire class must attend</i> )		<i>If you are presenting, upload your Powerpoint presentation before class</i>
<b>Tues., June 6<sup>th</sup></b>	IN CLASS PRESENTATIONS ( <i>Godwin, Jackson and TAs present; entire class must attend</i> )		<i>If you are presenting, upload your Powerpoint presentation before class</i>
<b>Thurs., June 8<sup>th</sup></b>	SUMMARY/ REVIEW FOR FINAL ( <i>Godwin</i> )		<i>Final Written Reports Due</i>
<b>Monday June 12<sup>th</sup></b>	<b>FINAL EXAM 8 am – 11 am</b> ( <i>Godwin and TAs proctoring</i> ) 43-105 CHS
